Career Objective

Backend and Automation Engineer passionate about building scalable systems and automating complex workflows. Skilled in backend development, APIs, and workflow automation with a focus on problem-solving and efficiency. Seeking opportunities to contribute to impactful projects and grow in the field of software engineering.

Education

University of Ilorin – B.Eng. Computer Engineering (In Progress)

Technical Skills

- Backend Development: Python, FastAPI, REST APIs
- Automation Tools: n8n, Zapier, API Integrations
- Databases: Firebase (Firestore), SQL (beginner)
- Other Tools: Git/GitHub, Postman, Paystack/Stripe Integration

Projects

- **PromptVault** – A repository platform for AI prompts, featuring authentication and prompt-sharing system.
- **Automation Workflows** – Built n8n-based automations for data handling, notifications, and API-driven processes.

Experience & Events

- **234 AI Hackathons Games, Ibadan** – Collaborated with teams to develop AI-driven solutions in competitive hackathon settings.
- **GDG Ibadan Tech Event** – Participated in developer community sessions, exploring automation, backend engineering, and AI applications.

Achievements / Highlights

- Designed and deployed backend services for real-world projects.
- Practical experience building automation pipelines and integrating APIs.
- Active involvement in developer communities and tech hackathons.
